

ZABI AHMED

Web Developer

+91 7358310962 @ zabiahmed3717@gmail.com <https://zabi17.github.io/portfolio/> Chennai, TN

SUMMARY

Highly motivated Web Developer with a strong foundation in front-end technologies, including JavaScript and React. Experienced in building responsive, user-friendly interfaces and eager to expand into full-stack development. Skilled in problem-solving, writing clean code, and creating projects that balance functionality with modern design. Passionate about continuous learning, exploring new technologies, and contributing to innovative, real-world applications.

EXPERIENCE

Intern - Jr. Web Developer

AltSense

08/2025 - Present

Expense Manager: (React, Tailwind, JSON Server, LocalStorage)

- Developed a responsive web application to **track income and expenses** with dynamic visual insights.
- Built a **user authentication system** (signup/login) using **LocalStorage** for session management.
- Implemented **data filtering** by day, week, and month, along with **precise search and category filters** for efficient expense management.
- Integrated an **interactive pie chart** to visualize income and expense distribution.
- Managed and stored transaction data locally using a **JSON server (db.json)** to simulate a backend API.

Login-Dashboard: (React, Tailwind, JSON Server,Recharts)

- Designed and developed an interactive **analytics dashboard** to visualize financial data with pie and bar **charts**.
- Implemented **dynamic data** binding, enabling charts to automatically update based on local JSON data changes.
- Added light/dark **mode support** for enhanced user experience and accessibility.
- Focused on clean UI/UX design using **Tailwind** CSS for a modern, professional appearance.

PROJECTS

Portfolio

A personal portfolio website to showcase projects, skills, and contact details with a clean, responsive with modern animation design.

Gemini Chat-bot

An interactive AI chatbot built using flask and gemini API that simulates real-time conversations and provides dynamic responses.

QR-Code Generator

A web-based tool built with HTML, CSS, JavaScript along with Express that generates downloadable QR codes from user-entered text or URLs.

Simon Game

A browser-based memory game that challenges users to replicate increasing long color sequences with level progression and score tracking.

TECH STACK

Front-end Development

HTML CSS JavaScript React

Tailwind Bootstrap

Backend

Node.js Express EJS JSON

Python

Database

PostgreSQL RESTful API

EDUCATION

B.Tech (IT)

Aalim Muhammed Salegn Clg
of Engineering.

CGPA
7.8 / 10

2021 - 2025 Chennai, India

CERTIFICATIONS

Udemy | Caddy.tech

- Full Stack web development by Angela Yu.
- Complete course on React + TypeScript by Janis Smilga.
- Modern JavaScript by Jack Biofrid.
