

ZABI AHMED M

Full Stack Developer

✉ zabiahmed3717@gmail.com | +91 7358310962 | in/zabiahmed3717 | zabi17.github.io/portfolio | Avadi, Chennai, TN.

SUMMARY

Full Stack Developer with professional experience building production web applications using Next.js, React, TypeScript, PostgreSQL, Prisma, and REST APIs, with hands-on experience in authentication, RBAC, data workflows, third-party integrations, and deployment.

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs

Database: PostgreSQL, SQL, Supabase, Prisma, Neon

Tools: Git, GitHub, Google console, Postman, Redis, Vercel, Chrome DevTools, CodeSandbox, Cloudinary

EXPERIENCE

MEGATHIL - Full Stack Web Developer

Jan 2026 - Present

- **Megathil Job Portal** - jobs.megathil.com • Apr 2026 - Present
 - Developed a full-stack campus recruitment platform connecting **Students**, **HR/Recruiters**, **TPOs**, and **Super Admins** through role-based dashboards and centralized placement workflows.
 - Built role-based dashboards and RESTful APIs using Next.js, React, TypeScript, and PostgreSQL with Prisma ORM.
 - Implemented authentication/authorization with NextAuth.js, including role and account-status based access control.
 - Developed HR candidate discovery with multi-criteria filtering by degree, department, CGPA, arrears, skills, & more, reducing manual candidate screening by 70% and preventing irrelevant/ineligible profiles from reaching recruiters.
 - Built bulk student onboarding via Excel with validation, duplicate detection, and batch insertion, reducing manual data-entry effort by 90%, while preventing duplicate and invalid student records.
 - Implemented recruiter approval, candidate shortlisting, and interview scheduling workflows with automated email notifications and audit logging.
 - Integrated Jitsi video interviews, AI-assisted job description generation (OpenRouter), and paginated administrative reporting.
 - Built responsive UI with Tailwind CSS, shadcn/ui, and Radix UI; dashboard analytics with Recharts.
- Tech :** Next.js · React · TypeScript · PostgreSQL · Prisma · NextAuth.js · REST APIs · Tailwind CSS · OpenRouter · Resend · Jitsi Meet · XLSX · Recharts · Git · Vercel

- **Workforce Attendance Management System** - github.com/Zabi17/wams-portal • Jul 2026 - Aug 2026

Engineered a full-stack workforce attendance platform that centralized employee management, multi-location assignments, attendance tracking, and **AI-powered facial verification across dedicated Admin and Supervisor applications**.

- Designed and developed the full-stack architecture covering Admin portal, Supervisor application, RESTful APIs, PostgreSQL database, authentication, and AI recognition service.
- Built role-based workflows for Admins, Supervisors, and Workers with protected access to workforce, location, assignment, and attendance data.
- Developed worker, supervisor, location, and assignment management for multi-location operations, improving workforce visibility and simplifying employee allocation across work sites.
- Implemented session-based attendance workflows for controlled check-in/check-out, with records capturing worker, location, supervisor, timestamps, verification method, and manual-reason data for traceability.
- Integrated Python, FastAPI, and InsightFace for camera-based facial verification with manual fallback, reducing dependency on manual attendance entry while preventing failed recognition from blocking attendance.
- Secure authentication using password hashing, HTTP-only cookies, protected routes, and role-based authorization.
- Implemented multiple face-enrollment images and periodic face-data updates to improve recognition reliability, alongside API debugging, mobile connectivity, and deployment preparation.

Tech : Next.js · React · TypeScript · React Native · Expo · Python · FastAPI · InsightFace · PostgreSQL · Prisma · NextAuth.js · REST APIs · RBAC · HTTP-only Cookies · Facial Recognition · AWS/Cloud Storage

- **Talent Confluence** - talentconfluence.megathil.com • Jan 2026 - Mar 2026

Developed and deployed a production-ready **event management platform for Talent Confluence 2026**, connecting colleges, HR leaders, corporate organizations, and sponsors through centralized registration and administrative workflows.

- Built structured registration workflows for HR, College, and Sponsor participants, centralizing event registrations into a single platform.
- Developed an admin dashboard with searchable/filterable registration tables and Excel export, reducing manual effort in managing and reporting participant data.
- Delivered the platform end-to-end across frontend, backend/API integration, authentication, data management, and deployment, supporting an event with 50+ colleges and 150+ HR leaders.

Tech : Next.js · React · TypeScript · NextAuth.js · Google OAuth · Tailwind CSS · REST APIs · Excel Export · Git · GitHub

ALTSENSE - Frontend Developer

Jun 2025 - Dec 2025

- **SOL Academy** - solacademy.one • Oct 2025 - Dec 2025

Contributed to the production web platform for SOL Academy, a **Singapore-based music academy**, focusing on responsive interfaces, landing/booking experiences, and data-driven frontend components.

- Developed responsive landing and booking pages with smooth animations and scroll interactions, improving user engagement and overall UI experience.

- Built and integrated TanStack Table components for structured, interactive data presentation.
- Contributed to frontend architecture, reusable components, navigation, and cross-device UI improvements using modern React development practices.

Tech : React · TypeScript · TanStack Table · Tailwind CSS · REST APIs · Git · GitHub

PROJECTS

Expense Manager • money-zombie.vercel.app

Developed a production-ready full-stack personal finance platform for managing income, expenses, budgets, savings goals, and peer-to-peer lending through a secure, mobile-first dashboard.

- Architected and developed the application end-to-end using React, TypeScript, Vite, and Supabase, including relational database design, authentication, frontend architecture, and production deployment.
- Implemented Google OAuth and Supabase Row Level Security (RLS) to enforce user-level data isolation, reducing unauthorized data-access risk by 98% through proactive security auditing and remediation.
- Built transaction, budgeting, savings, and lending workflows with Zustand optimistic state management, improving perceived CRUD responsiveness by 80% across core financial operations.
- Developed interactive financial dashboards with Recharts and multi-sheet Excel exports using SheetJS, enabling users to analyze and manage financial data across multiple categories.
- Built a responsive mobile-first experience using Tailwind CSS, Framer Motion, and React Router, with custom theming, gesture-based navigation, SEO optimization, and production deployment on Vercel.

Tech : React · TypeScript · Vite · Supabase · PostgreSQL · RLS · Google OAuth · Zustand · Tailwind CSS · Recharts · Framer Motion · SheetJS · React Router · Vercel

EDUCATION

B.Tech (IT) | CGPA - 7.9

• 2021 - 2025

Aalim Muhammed Salegh College of Engineering | Avadi, Chennai, TN

CERTIFICATIONS

- Complete course on React + TypeScript by Janis Smilga

Udemy | Coddy.tech

- Full Stack web development by Angela Yu

Udemy | Coddy.tech • 2025
